

Confine Space Entry

The Confined Space Entry course will instruct students how to identify, characterize and safely enter confined spaces. Hazards associated with entering confined spaces and lockout, tag out, self – rescue and non-entry extraction procedures will be covered during the program.

Students should include confined space supervisors, entrants and attendants, as well as rescue personnel who require training to the level of authorized entrants as prerequisite for rescue training and operations.

Upon completion of the training, students will receive a certificate in accordance with
29 CFR 1910.146.
