

Hearing Conservation Program Evaluation & Training

The Occupational Safety and Health Administration (OSHA) requires employers to administer an effective Hearing Conservation Program whenever employee noise exposure equals or exceeds an 8-hour time-weighted average (TWA) sound level of 85 decibels (29 CFR 1910.95(C)(1)).

- **Through monitoring, you have determined that some employees are exposed to occupational noise at levels where OSHA requires you to have an effective Hearing Conservation Plan.**
- **Our hearing conservation plan includes monitoring, employee notification and observation of monitoring, hearing testing, hearing protection, training, and recordkeeping.**
- **This training program will cover:**
 - **Impact of workplace noise on hearing**
 - **Advantages and disadvantages of hearing protection devices**
 - **Use, care, and fit of hearing protection devices**
 - **Need for hearing testing and what to expect**
